Total of reporting towns.	940,097	309	96	31	66	10	4	10

REPORTED DEATHS FROM PREVALENT DISEASES IN 19 CITIES AND TOWNS OF MASSACHUSETTS:

Thirty-one deaths were reported from the principal infectious diseases: diphtheria and croup, 10; diarrhœal diseases, 10; typhoid fever, 4; whooping-cough, 3: cerebro-spinal meningitis, 3: erysipelas, 1.

There were 66 deaths from consumption; lung diseases, 29;; still births, 17.

No deaths were reported from small-pox, measles, and malarial fever.

From whooping-cough: Boston, 3. From cerebro-spinal meningitis: Worcester, 2; Boston, 1. From erysipelas: Springfield, 1.

Deaths from the principal infectious diseases numbered 31 against 33 for the preceding week.

Deaths under five years of age numbered 96 against 72 for the preceding week.

There is a slight decrease in the deaths from diphtheria and croup, and an increase in the mortality from diarrhœal diseases. No noteworthy changes in the other diseases.

Cases reported in Boston: scarlet fever, 20; diphtheria, 17; measles, 17; and typhoid fever, 7.

The death-rates for the week were: Boston, 19.18: Worcester, 18.24; Lowell, 12.99; Cambridge, 12.46; Fall River, ——; Lynn, 15.82; Lawrence, 17.42; Springfield, 22 08; New Bedford, 17.16; Somerville, ——; Salem, ——; Holyoke, 22.32; Chelsea, 24.24: Taunton, 6.60; Haverhill, ——; Gloucester, 9.56: Brockton, ——; Newton, 10.52; Malden, 22.19; Fitchburg, 6.86: Waltham, 7.12: Newburyport, 19.00: Northampton, ——.

The total death-rate for the week was 17.09 against 17.73 and 15.85 for the two previous weeks.

WEEKLY RETURN OF MORTALITY

-OF-

MASSACHUSETTS.

Feb. 20, 1886.

PUBLISHED BY ORDER OF THE

State Board of HEALTH, LUNACY AND CHARITY.

STATE LIBRARY OF MASSACHUSETTS,
STATEHOUSE, BOSTON.
MAR 7 1919
STATE LIBRARY OF MASSACHUSETTS
MAY 6 1886

MORTALITY OF MASSACHUSETTS

For the Week ending February 20, 1886.

Deaths reported to the State Board of Health, Lunacy, and Charity in 111 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases.

Population by State Census of 1885.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Diphtheria and Croup	Diarrhœal Diseases.	Scarlet Fever.
Total of reporting towns,	1,376,736	441	128	55	68	7	6	26

REPORTED DEATHS FROM PREVALENT DISEASES IN 111 CITIES AND TOWNS OF MASSACHUSETTS:

Fifty-five deaths were reported from the principal infectious diseases: diphtheria and croup, 26; diarrhœal diseases, 7; whooping-cough, 6; typhoid fever, 5; erysipelas, 3; cerebro-spinal meningitis, 3; scarlet fever, 2; puerperal fever, 1; gastric fever, 1.

There were 68 deaths from consumption; lung diseases, 51; still births, 26.

No deaths were reported from small-pox, malarial fevers and measles.

From typhoid fever: Lowell 2; Boston Cambridge, and Lynn, 1 each. From erysipelas: Boston, 2, Springfield, 1. From cerebro-spinal meningitis: Boston, Worcester, and Waltham, 1 each. From scarlet fever: Boston and Lowell, each 1. From puerperal fever: Boston, 1. From gastric fever: Westboro, 1.

Deaths from the principal infectious diseases numbered 55 against 37 for the preceding week.

Deaths under five years of age numbered 128 against 127 for the preceding week.

The mortality from typhoid fever, diphtheria and croup, is somewhat greater than for the previous week; from scarlet fever and consumption it is less. No noteworthy changes in the other diseases.

Cases reported in Boston: diphtheria, 28; scarlet fever, 23; typhoid fever, 8; and measles, 2.

Death-rates for the week were: Boston, 22.51; Worcester, 13.68; Lowell, 30.85; Cambridge, 21.75; Fall River, 18.28; Lynn, 9.04; Lawrence, 26.80; Springfield, 19.38; New Bedford, 28.03; Somerville, ——; Salem, 20.35; Holyoke, ——; Chelsea, 24.24; Taunton, 19.80; Haverhill, 19.04; Gloucester, 19.12; Brockton, 22.50; Newton, 15.78; Malden, ——; Fitchburg, ——; Waltham, 7.12; Newburyport, ——; Northampton, 12.09.

The total death-rate for the week was 17.41 against 17.35 and 14.83 for the previous two weeks.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Typhoid Fever.	Diphtheria and Croup	Scarlet Fever.
Total of reporting towns,	1,290,493	460	129	35	85	5	14	5

REPORTED DEATHS FROM PREVALENT DISEASES IN 112 CITIES AND TOWNS OF MASSACHUSETTS:

Thirty-five deaths were reported from the principal infectious diseases: diphtheria and croup, 14; scarlet fever, 5; typhoid fever, 5; cerebro-spinal meningitis, 4; erysipelas, 2; puerperal fever, 1.

There were 85 deaths from consumption; lung diseases, 66; still births, 27.

No deaths were reported from small-pox, measles, whooping-cough and malarial fevers.

From cerebro-spinal meningitis: Boston, Worcester, Fitchburg and Hudson, 1 each. From puerperal fever: Boston, 1. From erysipelas: Boston, 2.

Deaths from the principal diseases numbered 35 against 55 for the preceding week.

Deaths under five years of age numbered 129 against 128 for the preceding week.

The mortality from lung diseases is somewhat greater than for the previous week; from diphtheria and croup it is less. No noteworthy changes in the other diseases.

Cases reported in Boston: scarlet fever, 41; diphtheria, 21; typhoid fever, 9; and measles, 4.

Death-rates for the week were: Boston, 26.64; Worcester, 18.24; Lowell, 23.54; Cambridge, 26.97; Fall River, ——; Lynn, 20.34; Lawrence, 10.72; Springfield,——; New Bedford, 21.80; Somerville, ——; Salem, 25.90; Holyoke, 20 52: Chelsea, 26.26: Taunton, 15.40: Haverhill, ——; Gloucester, 7.17; Brockton, 10.68; Newton, 15.78; Malden, 15.85; Fitchburg, 15.90; Waltham, 14.24; Newburyport, 23.03; Northampton, 28.21.

The total death-rate for the week was 18.54 against 17.41 and 17.35 for the previous two weeks.

(SIGNED) S. W. ABBOTT, M. D., *Health Officer.*

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Typhoid Fever.	Diphtheria and Croup	Scarlet Fever.
Total of reporting towns,	1,320,837	490	144	57	101	18	9	8

REPORTED DEATHS FROM PREVALENT DISEASES IN 110 CITIES AND TOWNS OF MASSACHUSETTS:

Fifty-seven deaths were reported from the principal infectious diseases: diphtheria and croup, 18; cerebro-spinal meningitis, 9; scarlet-fever, 8; diarrhœal diseases, 7; whooping-cough, 4; puerperal fever, 2; typhoid fever, 4; measles, 4; erysipelas, 1.

There were 101 deaths from consumption; lung diseases, 64; still births, 20.

No deaths were reported from small-pox and malarial fevers.

From diarrhœal diseases: Boston, 5; Cambridge and Lynn, 1 each. From whooping-cough: Boston, Holyoke, Northampton, and Longmeadow, 1 each. From typhoid fever: Boston, 2, Lowell and Holyoke, 1 each. From puerperal fever: Cambridge and Melrose, 1 each. From measles: Holyoke, 3; Boston, 1. From erysipelas: Boston, 1.

Deaths from the principal diseases numbered 57 against 35 for the preceding week.

Deaths under five years of age numbered 144 against 129 for the preceding week.

The mortality from consumption is considerably greater than for the previous week; from cerebro-spinal meningitis, diarrhœal diseases, diphtheria and croup somewhat greater. No noteworthy changes in the other diseases.

Cases reported in Boston: scarlet fever, 33; diphtheria, 27; typhoid fever, 12; and measles, 7.

Death-rates for the week were: Boston, 25.44; Worcester, 20.52; Lowell, 22.72; Cambridge, 17.40; Fall River, 10.05; Lynn, 16.96; Lawrence, 22.78; Springfield, 20.76; New Bedford, 17.13; Somerville, ——; Salem, 24.15; Holyoke, 22 08; Chelsea, 24.24; Taunton, 8.80; Haverhill, ——; Gloucester, 9.56; Brockton, 17.50; Newton, 13.15; Malden, 6.34; Fitchburg, 16.90; Waltham, 24.92; Newburyport, 26.32; Northampton, 36.27.

The total death-rate for the week was 19.29 against 18.54 and 17.41 for the previous two weeks.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Typhoid Fever.	Diphtheria and Croup	Scarlet Fever.
Total of reporting towns,	1,262.875	444	133	50	70	9	21	8

REPORTED DEATHS FROM PREVALENT DISEASES IN 108 CITIES AND TOWNS OF MASSACHUSETTS:

Fifty deaths were reported from the principal infectious diseases: diphtheria and croup, 21; typhoid fever, 9; scarlet-fever, 8; diarrhœal diseases, 6; erysipelas, 2; whooping-cough, 2; cerebro-spinal meningitis, 2; malarial fevers, 1.

There were 70 deaths from consumption; lung diseases, 61; still births, 20.

No deaths were reported from small-pox, measles and puerperal fever.

From diarrhœal diseases: Boston, 3; Cambridge, Lynn and Springfield, 1 each. From erysipelas: Boston and Springfield, 1 each. From whooping-cough: Boston and Chelsea, 1 each. From cerebro-spinal meningitis: Fall River and Quincy, 1 each. From malarial fevers: Longmeadow, 1.

Deaths from the principal infectious diseases numbered 50 against 57 for the preceding week.

Deaths under five years of age numbered 133 against 144 for the preceding week.

The mortality from consumption is considerably less than for the preceding week. No noteworthy changes in the other diseases.

Cases reported in Boston: scarlet fever, 28; diphtheria, 24; measles, 10; and typhoid fever, 4.

Death-rates for the week were: Boston, 24.38; Worcester, ——; Lowell, 28.41; Cambridge, 26.10; Fall River, 21.02; Lynn, 25.99; Lawrence, 12.06; Springfield, 30.45; New Bedford, 29.58; Somerville, ——; Salem, ——; Holyoke, 10.24; Chelsea, 14.14; Taunton, 13.20; Haverhill, ——; Gloucester, 16.73; Brockton, ——; Newton, 26.30; Malden, 25.36; Fitchburg, 6.76; Waltham, 17.80; Newburyport, 9.87; Northampton, 4.03.

The total death-rate for the week was 18.28 against 19.29 and 18.54 for the previous two weeks.

(SIGNED) S. W. ABBOTT, M. D., *Health Officer.*

WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

Apr. 10, 1886.

PUBLISHED BY ORDER OF THE

State Board of HEALTH, LUNACY AND CHARITY.

STATE LIBRARY
STATE HOUSE, BOSTON
MASSACHUSETTS
MAY 27 1919
1886

MORTALITY OF MASSACHUSETTS

For the Week ending April 10, 1886.

Deaths reported to the State Board of Health, Lunacy, and Charity in 107 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases.

Population by State Census of 1885.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Diarrhœal Diseases.	Diphtheria and Croup	Scarlet Fever.
Total of reporting towns.	1,246,491	432	122	40	81	6	12	5

REPORTED DEATHS FROM PREVALENT DISEASES IN 107 CITIES AND TOWNS OF MASSACHUSETTS:

Forty deaths were reported from the principal infectious diseases: diphtheria and croup, 12; diarrhœal diseases, 6; scarlet-fever, 5; cerebro-spinal meningitis, 3; whooping-cough, 3; erysipelas, 4; typhoid fever, 3; puerperal fever, 3; brain fever, 2.

There were 81 deaths from consumption; lung diseases, 57; still births, 30.

No deaths were reported from small-pox, measles and malarial fevers.

From erysipelas: Boston, 3; Dalton, 1. From cerebro-spinal meningitis: Boston, Lowell, and Taunton, 1 each. From whooping-cough: Boston, 3. From typhoid fever: Lowell, 2; Plymouth, 1. From puerperal fever: Boston, Lowell, and Cambridge, 1 each. From brain fever: Nantucket, 2.

Deaths from the principal infectious diseases numbered 40 against 50 for the preceding week.

Deaths under five years of age numbered 122 against 133 for the preceding week.

There is a decided decrease in the mortality from typhoid fever, diphtheria, and croup. No noteworthy changes in the other diseases.

Cases reported in Boston: scarlet fever, 36; diphtheria, 20; measles, 16; and typhoid fever, 3.

Death-rates for the week were: Boston, 25.44; Worcester, 19.76; Lowell, 30.04; Cambridge, 16.02; Fall River, 17.37; Lynn, 15.82; Lawrence, 16.08; Springfield, ——; New Bedford, 20.28; Somerville, ——; Salem, 14.80; Holyoke, ——; Chelsea, 24.24; Taunton, 11.11; Haverhill, ——; Gloucester, 16.73; Brockton, 14.24; Newton, 13.15; Malden, 9.51; Fitchburg, 10.14; Waltham, 17.80; Newburyport, 15.60; Northampton, ——.

The total death-rate for the week was 18.00 against 18.28 and 19.29 for the previous two weeks.

(SIGNED) S. W. ABBOTT, M. D., *Health Officer.*

MORTALITY OF MASSACHUSETTS

For the Week ending May 22, 1886.

Deaths reported to the State Board of Health, Lunacy, and Charity in 109 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases.

Population by State Census of 1885.

WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

PUBLISHED BY ORDER OF THE

STATE BOARD OF HEALTH.

STATE LIBRARY
OF
MASS.
MAY 27 1919
CANCELED
BY

MORTALITY OF MASSACHUSETTS

For the Week ending May 29, 1886.

Deaths reported to the State Board of Health in 20 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases.

Population by State Census of 1885.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Diarrhœal Diseases.	Typhoid Fever.	Diphtheria and Croup
Total of reporting towns,	946,718	282	73	28	54	10	4	9

Attention is called to the change in the present report. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

REPORTED DEATHS FROM PREVALENT DISEASES IN THE 20 CITIES AND GREATER TOWNS OF MASSACHUSETTS:

Twenty-eight deaths were reported from the principal infectious diseases: diphtheria and croup, 9; diarrhœal diseases, 10; typhoid fever, 4: scarlet fever, 3: cerebro-spinal meningitis, whooping-cough, and erysipelas, each 1.

There were 54 deaths from consumption; lung diseases, 31: still births, 19.

No deaths were reported from small-pox, measles, and malarial fevers.

From scarlet fever: Boston, 2: Worcester, 1. From cerebro-spinal meningitis: Worcester, 1. From whooping cough: Boston, 1. From erysipelas: Boston, 1.

Deaths from the principal infectious diseases numbered 28, the same as for the preceding week.

Deaths under five years of age numbered 73 against 96 for the preceding week.

There is a slight increase in the deaths from consumption. No noteworthy changes in the other diseases.

Cases reported in Boston: scarlet fever, 20; diphtheria, 13; measles, 12; and typhoid fever, 4.

Death-rates for the week were: Boston, 19.05: Worcester, 14.44; Lowell, ——; Cambridge, 14.24; Fall River, 14.62: Lynn, 14.69; Lawrence, 9.38; Springfield, 15.18; New Bedford, 18.72; Somerville, ——; Salem, 14.80; Holyoke, ——; Chelsea, 6.06; Taunton, 4.40: Haverhill, ——; Gloucester, ——; Brockton, 10.00; Newton, 13.15; Malden, 3.17: Fitchburg, 27.04; Waltham, 7.12: Newburyport, 15.20; Northampton, ——.

The total death-rate for the week was 15.49 against 15.26 and 17.09 for the two previous weeks.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Diarrhœal Diseases.	Diphtheria and Croup	Scarlet Fever.
Total of reporting towns,	976,894	340	94	56	66	26	17	4

REPORTED DEATHS FROM PREVALENT DISEASES IN THE 20 CITIES AND GREATER TOWNS OF MASSACHUSETTS:

Fifty-six deaths were reported from the principal infectious diseases: diarrhœal diseases, 26; diphtheria and croup, 17; scarlet fever, 4; whooping-cough, 3: typhoid fever, 2; cerebro-spinal meningitis, 2; erysipelas, 1.

There were 66 deaths from consumption; lung diseases, 31; and still births, 14.

From whooping-cough: Fall River, 2; Chicopee, 1. From typhoid fever, Lowell and Lawrence, 1 each. From cerebro-spinal meningitis: Springfield and Fitchburg, 1 each.

Deaths from the principal infectious diseases numbered 56 against 28 for the preceding week.

Deaths under five years of age numbered 94 against 73 for the preceding week.

The mortality from diarrhœal diseases is nearly three times greater than for the preceding week. No noteworthy changes in the other diseases.

Death-rates for the week were: Boston, 20.78; Worcester, 17.48; Lowell, 19.48: Cambridge, 16.02; Fall River, 14.62: Lynn, ——; Lawrence, 16.08; Springfield, 24.84; New Bedford, 12.48; Somerville, ——; Salem, ——; Holyoke, 24.18; Chelsea, 8.08; Taunton, 4.40; Haverhill, ——; Gloucester, 25 29; Brockton, 10.00; Newton, 10.52; Malden, 6.34; Fitchburg, 27.04; Waltham, 10.68; Newburyport, ——; Northampton, ——.

The total death-rate for the week was 18 02 against 15.49 and 15.26 for the previous two weeks.

RECAPITULATION.

	Population.	Deaths.	Deaths under five.	Infectious Diseases.	Consumption.	Diarrhœal Diseases.	Whooping Cough.	Diphtheria and Croup
Total of reporting towns.	956,053	391	193	118	46	91	6	14

REPORTED DEATHS FROM PREVALENT DISEASES IN THE 20 CITIES AND GREATER TOWNS OF MASSACHUSETTS:

One hundred and eighteen deaths were reported from the principal infectious diseases: diarrhœal diseases, 91; diphtheria and croup, 14; whooping-cough, 6; cerebro-spinal meningitis, 3; scarlet fever, 3; measles, 1; erysipelas, 1; puerperal fever, 1.

There were 46 deaths from consumption; lung diseases, 23; still births, 17.

From cerebro-spinal meningitis: Fall River, Holyoke and Woburn, 1 each. From scarlet fever: Cambridge, 2; Waltham, 1. From measles: Worcester, 1. From erysipelas: Lowell, 1. From puerperal fever: Boston, 1.

Deaths from the principal infections diseases numbered 118 against 35 for the preceding week.

Deaths under five years of age numbered 193 against 206 for the preceding week.

The mortality from the principal infectious diseases is 118 this week as compared with 35 last week. The increase is due to the diarrhœal diseases, which are 91 this week instead of 15 for last week. No noteworthy changes in the other diseases.

Cases reported in Boston: measles, 24; diphtheria, 19; scarlet fever, 10; typhoid fever, 6.

Death-rates for the week were: Boston, 24.24; Worcester, 19.00; Lowell, 26.79; Cambridge, 24.92; Fall River, 22.50; Lynn, 19.21; Lawrence, ——; Springfield, ——; New Bedford, 14.04; Somerville, ——; Salem, 18.50; Holyoke, 26.04; Chelsea, ——; Taunton, 8.80; Haverhill, ——; Gloucester, 7.17; Brockton, 15.00; Newton, 10.52; Malden, 12.68; Fitchburg, 23.66; Waltham, 7.12; Newburyport, 15.20; Northampton, ——.

The total death-rate for the week was 21.27 against 18.76 and 18.02 for the previous two weeks.

WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

PUBLISHED BY ORDER OF THE

STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
AUG 14 1888
MAY 27 1909

MORTALITY OF MASSACHUSETTS

For the Week ending July 24, 1886.

Deaths reported to the State Board of Health in 19 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

PUBLISHED BY ORDER OF THE

STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
AUG 14 1886

MORTALITY OF MASSACHUSETTS

For the Week ending August 7, 1886.

Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

MAY 2 1886

MORTALITY OF MASSACHUSETTS

For the Week ending September 4, 1886

Deaths reported to the State Board of Health in 22 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

MORTALITY OF MASSACHUSETTS

For the Week ending September 18, 1886.

Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

MORTALITY OF MASSACHUSETTS

For the Week ending October 9, 1886.

Deaths reported to the State Board of Health in 23 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

CANCELLED

MORTALITY OF MASSACHUSETTS

For the Week ending October 30, 1886.

Deaths reported to the State Board of Health in 24 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

Nov. 20, 1886.

PUBLISHED BY ORDER OF THE

STATE BOARD OF HEALTH.

STATE LIBRARY OF MASSACHUSETTS,
STATE HOUSE, BOSTON.
MAY 27 1919
CANCELLED

MORTALITY OF MASSACHUSETTS

For the Week ending November 20, 1886.

Deaths reported to the State Board of Health in 21 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.

WEEKLY RETURN OF MORTALITY

- OF -

MASSACHUSETTS.

Dec. 11, 1886.

PUBLISHED BY ORDER OF THE

STATE BOARD OF HEALTH.

STATE LIBRARY
STATE HOUSE
DEC 27 1886
MASSACHUSETTS,
BOSTON.
MAY 27 1919
RECEIVED

MORTALITY OF MASSACHUSETTS

For the Week ending December 11, 1886.

Deaths reported to the State Board of Health in 19 Cities and Towns.

The number of deaths *reported* each week does not exactly correspond with the number which *occurred* during that week, but the discrepancy is a slight one in most cases. The mortality report will in future be published weekly, and will contain the returns from all cities and towns having a population of more than 10,000 inhabitants. A monthly report will also be issued, to contain the returns from all reporting towns for the month.

We shall esteem it a great favor if all reporting towns will send us their returns weekly, as heretofore, upon the postal cards provided for the purpose. A supply of these cards will be sent to any town clerk or health officer who has charge of such returns and is willing to comply with this request.

Population by State Census of 1885.
